Foule Théâtre

Technical information sheet

<u>Ideal stage dimensions</u> :	Opening	8 metres
	Depth	6 metres
	Height	4 metres

The stage must be equipped with black drop curtains to create a black box + black back-drop.

The show requires a fully equipped space
(see the attached list of lighting and sound requirements on the lighting plan)

Electrical power: 40A in 3 x 220V or 25A in 3x 380V

Blackout is indispensable

The show is preferably presented on **a one-level playing area**.

To ensure good visibility, terraced seating should be provided for the spectators

Duration : 60 minutes

Set-up : 2 hours 30 minutes before the show

Set-up scheduled at ...

Bring-down : 30 minutes

1 technician is required to help with load-in and load-out of scenery and equipment.

1 technician with knowledge of the sound and lighting infrastructure on the site is required throughout the set-up and during the show.

The surveillance of equipment belonging to Foule Théâtre on the site of the show is the responsibility of the host structure

If technical equipment is hired to equip the site, the mounting and connection of this equipment will be carried out by the hire company, not by Foule Théâtre. Foule Théâtre can not be held responsible for any dysfunction in the hired equipment.
